

Hello

This is a Turnkey Customized Whole Food Nutritional Supplement Program based on a DNA Test that requires the swipe of your cheek with a cotton swab. The genetics lab is a public company and has been in business for 14 years and has over 500 peer reviewed journal articles. **The customized nutritional supplements are food based with 60- 90 ingredients based on your DNA & LIFESTYLE risks. This is almost a “hands free” program. No stocking or inventory of nutritional products. Your clients / patients are educated on each of the ingredients in their personalized formulation and patient compliance is substantially increased when they understand why they are taking their supplements & the ingredients in them. This can be automatic by e-mail or by you.**

We also provide an individualized nutrition-counseling program to address how to eat for weight loss and disease prevention or management. This is a separate program we have been offering now for 17 years nationwide.

This is a proposal to become a wholesale distributor perform some beta testing and is as a pre-launch offer. The company is will be shipping to consumer and physicians August 1 2008. A distributorship which includes DNA test kits (envelopes) & nutritional supplements which can be shipped to your office or you patients / clients homes. It also includes a web site for ordering and marketing materials for your client/ patients.

**I anticipate the distributor buy in will substantially increase in August.
Please do your research now; to get in the ground floor has HUGE ADVANTAGES.**

I am looking for professional health related individuals to beta test this program.

I think this is amazing.

Please let me know what you think.

I am available for seminars for you!

Please watch this Fox News report that aired on June 6, 2008

FOX NEWS REORT ON DNA & VITAMINS
